

Laserlban™ for Windows®, version 1.0

Welcome to Laserlban for Windows. You now have at your fingertips professional-quality fonts in both TrueType® and Type 1 PostScript® formats for typing Iban, and Iban-related languages. The product also provides keyboard software for easy input of all characters in the font.

1. Copyright and Trademark Information

- a. Iban character shapes © 2009 Dr. Bromeley Philip and Dunging Gunung. All rights reserved. Used by Permission. Laserlban User's Manual and IbanLS fonts © 2009 Payne Loving Trust. All rights reserved. By copyright law this software program may not be modified or copied for others, whether or not sold.
- b. Laserlban and IbanLS are trademarks of the Payne Loving Trust.

2. System Requirements

- a. Operating Systems:
 - 1) Requires Windows Vista, Windows XP, or Windows 2000.
- b. Applications:
 - 1) Requires any application which will allow you to choose a font that is installed into Windows from a font menu.
- c. Known problems:
 - 1) Some of your applications' default settings must be changed to avoid unexpected results when using these fonts and keyboard software. Alternatively, you must start Word using the included LinguistCustom Word template file. Complete instructions for doing this are included.
 - 2) Laserlban ships with both TrueType and Type 1 (PostScript) format fonts. The setup program has installed the TrueType version of the fonts into your system. Both TrueType and Type 1 fonts are scalable, vector fonts that will print to the highest quality capable by your printer. Normally, Type 1 fonts are only needed when you are sending your work to a commercial printer that requires PostScript files. We strongly recommend the use of TrueType fonts instead of Type 1 because some applications in some situations do not properly handle Type 1 fonts with custom encodings, e.g. spacing and word wrap. Furthermore, it is important users do *not* install both our TrueType and Type 1 fonts at the same time. When TrueType and Type 1 fonts *having the same name* are installed at the same time, problems may occur, producing unexpected results. If you must use Type 1 then you should first uninstall the TrueType fonts using the Fonts Control Panel before installing the Type 1 fonts, which are now located on your computer hard drive at c:\Program Files\Linguist's Software\Laserlban\Type1. We urge you to contact Tech Support before doing this.

3. Registering Laserlban for Windows

- a. If you purchased this product directly from Linguist's Software you already are registered and eligible for support and product upgrades.
- b. If you have purchased this product from a reseller you must mail or fax the blue registration card to us to register your purchase. If you no longer have the blue registration card please contact the sales office (425-775-1130 or sales@linguistsoftware.com) for registration information. You must register to be eligible for support and for product upgrades.

4. Contacting Linguist's Software

- a. TECHNICAL SUPPORT:
 - 1) Phone (425) 775-1130, 9 AM - 5 PM Pacific Time
 - 2) Email us at winsupport@linguistsoftware.com
- b. INFORMATION:
 - 1) Web: www.linguistsoftware.com/liban.htm
 - 2) Email: fonts@linguistsoftware.com
- c. ORDERS:
 - 1) Linguist's Software
 - 2) PO Box 580, Edmonds, WA 98020-0580
 - 3) phone: (425) 775-1130, fax (425) 771-5911
 - 4) email: sales@linguistsoftware.com
 - 5) web: www.linguistsoftware.com

5. Uninstalling Laserlban for Windows

- a. To uninstall this product run Uninstall in the Laserlban Program Group on the Start menu.
- b. Alternatively, find the uninstaller program in Add or Remove Programs in Control Panel.

6. Release History

- Version 1.0 – December 21, 2009
 - Initial release of Laserlban for Windows.
 - Requires Windows Vista, XP, or 2000, plus any application that allows the user to select a font from the font menu.
 - Includes one TrueType® IbanLS™ font supporting Iban, provided in plain (regular), bold, italic, and bold-italic tpestyles.
 - The Windows and Macintosh versions of IbanLS are cross-platform compatible. Documents, such as Word documents, typed with the IbanLS font, may be transferred back and forth between Windows and Mac, as long as the font is installed.
 - The fonts are arranged so Iban text may be sorted using Word's Sort feature.
 - Includes the IbanLS software keyboard, which installs from the Start menu with a single mouse click.
 - All documentation is in Adobe PDF or Microsoft Word format (either *.doc or *.rtf).
 - Setup Instructions
 - Laserlban User's Manual
 - Customize Word Settings PDF document
 - LinguistCustom Word template
 - Using This Template Word document
 - Troubleshooting Manual
 - The product installs with an automated installer, which creates a Linguist's Software Program Group on the Windows Start menu. An uninstaller is included.
